Abstract:

Person of Interest is an American science fiction television serie that recreates the permanent surveillance of citizens' daily life and attributes the obtaining of private information to a super artificial intelligence; however, a scientific analysis reveals that actually the television serie is recreating surveillance with cerebral internet of citizens with secret implantation of invasive neurotechnology such as brain nanobots. Actually, the television series seeks manufacture the consent to the use of the cerebral internet under the argument of security. There are many evidences that suggest that its actual script is being based on illicit human experimentation with cerebral internet in the world, mainly in United States and Latin America. It is very likely that there are many real "Person of interest", beautiful women, millionaries, eminent scientists, prosecutors, judges among others. They are permanently monitored, not for their safety, but for the illicit enrichment of a mafia of prosecutors, policemen, and journalists. The world society shall know, be alert and report the crimes committed by this Hollywood's mafia that aims to become a great organized crime network in the world.

Key words: Internet, Privacy, Brain-Computer Interface, New York's, Latin America,

★Corresponding Author: David Salinas*

Introduction:

Person of Interest is an American science fiction television serie about a computer engineer who has built for the government a super artificial intelligence that is able to monitor and collect millions of data of anonymous citizens and predict which of them would be involved in terrorist acts. Harold Finch, who is creator of the super computer, recruit different persons to form a surveillance team in New York's. This team is conformed by Harold Finch, a computer ingeneer, Jhon Reese, a Special Forces veteran and former CIA agent, Joss Carter, a police woman of New York's, a prosecutor Lionel Fusco, Samantha "Root" Groves, a highly intelligent computer hacker and Sameen Shaw, a former hired asesinan. (Fig 1)

Fig 1: Person of interest: The promotion

Source: Person of interest.

The Tv serie was created for CBS by Jonathan Nolan, has 103 episodes⁽¹⁾ and was aired over five seasons from 2011 to 2016. Critics consider that Personof Interest became Essential Science Fiction Television⁽²⁾.

Person of Interest’s slogan synthesizes the plot of the television series:

“You are being watched. The government has a secret system: a machine that spies on you every hour of every day. .. I designed the machine to detect acts of terror, but it sees everything. Violent crimes involving ordinary people; people like you. Crimes the government considered 'irrelevant'. They wouldn't act, so I decided I would. But I needed a partner, someone with the skills to intervene. Hunted by the authorities, we work in secret. You'll never find us, but victim or perpetrator, if your number's up... we'll find you”.

Contents:

The star of the “Person of Interest”tv serie is “The Machine”^(3,4), Nolan said:

The show has always been about AI ⁽⁴⁾

The machine is an all-seeing artificially intelligent system, created at the request of the U.S. government, to sift through the data collected by NSA mass surveillance. Ittracks the movements and communications of every person in America through the cell phone networks, GPS satellites and surveillance cameras we interact with every day. Itreads every e-mail, listens to every phone call, and watches every CCTV camera.

(Fig 2)

Fig 2: “The Machine”: The super artificial intelligence that make mass surveillance

Source: Person of Interest

It is able to accurately predict premeditated lethal crime by analysing the data from all surveillance cameras and electronic communications worldwide which are fed to it by arrangement with the NSA. It divides those crimes based on whether they are relevant to national security; those relevant cases are handled by the U.S. government, while the non-relevant cases in New York City are the focus of the show.

Person of Interest's reviewers have analyzed the series focusing that it is based on the work of a super artificial intelligence however, a scientific analysis reveals that the tv serie only can be explained with surveillance with cerebral internet and secret implantation of invasive neurotechnology in New York citizens. Actually,

The "Machine" is a recreation of the cerebral internet.

Cerebral internet is a means of communication developed in a person who has in his brain, implants, nanobots or microchips with which a tele transmission of his/her daily life would be performed. This is sent via wi-fi to cell phones, computers and televisions and even to other brains; thus, a tele visualization of the victim's daily life would be done with cerebral internet. In short, any person would see another person's entire life, minute by minute, through a cell phone or computer⁽⁵⁾.

Scientific researches about cerebral internet only has been reported in experiments with animals, such as monkeys and rats. However scientists like Michio Kaku claim that prototypes already exist and that he has seen them in the laboratory but the most serious fact is that recent investigations warn of forced and secret human experimentation with brain nanobots and microchips in the world, mainly in Latin American universities^(5,6).

Actually, the secret of the "Person of interest" is that it recreates a city with citizens who secretly have brain nanobots or microchips, they are spied on without their consent with cerebral internet. (Fig 3)

Fig 3: The secret of "Person of interest":The Cerebral Internet

The large amount of information obtained by "The Machine" is a mystery (Left) The big information obtained about citizens only can be explained with surveillance of citizens who have secretly installed brain nanobots. Cerebral Internet is the real method of mass surveillance in Person of interest (Right)

Source:

Left (Person of Interest. Season 1. Chapter 11: "Super"). Right (Copyright author).

Harold Fynch's department is just a recreation of the video editing rooms of intelligence centers like the CIA that illegally accumulates citizen data with the brain internet. Throughout the serie, cerebral internet is not mentioned neither to the extras of the serie nor in the interviews.

Person of interest is cataloged by analysts as a science fiction Tv serie.

"I'm unabashed about the fact that it's a science-fiction show".⁽⁷⁾

Science Fiction is distinguished by the narrative dominance of a novum.⁽⁸⁾ Novum is the hypothetical new object or scientific discovery on which the story is based, it could exist through science and not only through magic.⁽⁹⁾

The real Novum of "Person of interest" is cerebral internet.

"Person of interest" has been designed carefully with a purpose: the promotion of this novum, the cerebral internet. The press knows this secret goal of the TV serie, the promotion of cerebral internet. An article of press says:

"Since the beginning, this show that's ostensibly been about artificial intelligence is really about human connection"⁽¹⁰⁾.

There are several evidences in the serie that reveal that it recreates cerebral internet, among them:

a) The soliloquies of the characters of the Tvserie

A person with cerebral internet can be recognized for speaking alone, without having the appearance of being psychotic or having mobile hearing aids. Several characters of the surveillance team, perform soliloquies at certain times, probably the main character that makes these soliloquies is the hacker Ruth, who explicitly represents a person who communicates with cerebral internet, since it carries a brain-machine interface.

She says:

"I have a direct line to a higher power. It speaks to me."⁽¹¹⁾.

b) The kind of the information obtained is only explained with cerebral internet.

Ruth surprise to the psychiatrist in her medical appointment with him. She knows all the private information of the psychiatrist so she tells him the average number of cigarettes that he smokes⁽¹¹⁾. The only explanation for this scene is that an intelligence center such as CIA sends the psychiatrist's private information to Ruth's brain-computer interface.

c) The properties attributed to "the machine" are explained only with the cerebral internet

The promotion of this serie says:

"A machine that spies on you every day at all hours"

Although the explication about "The machine" says that is capable of joining everything, address email, profiles in social networks to access different services on the network, and allows Finch locate virtually any human in the world. Actually, all these actions only can be explained with cerebral internet.

The secret of this tv serie is not only that its recreates citizens who are spied on with the cerebral internet, there are many evidences that indicate that the real script of this tv serie is based on secrets illicit and forced human experiments with cerebral internet in the world, mainly in Latin America and United States. There are many reasons that support this fact:

a) The Discovery of Hollywood's nanomafias

Recent researches reveal evidences that the technological transnational companies, in illicit association with US army and the corrupt governments, have created an organization that is developing in the world a secret, forced and illicit neuro scientific human experimentation with invasive neurotechnology which can have even led scientists to win Medicine Nobel Prizes^(12,13). The US army has strong relations with Hollywood⁽¹⁴⁾, this is the reason that explain the existence of a mafia of Hollywood that produce films and tv series based on illicit human experimentation of US army.⁽¹⁵⁻
¹⁷⁾ Many science fiction writers are considered as "visionaries" or "prophets" however the real script of many science fiction films used by Hollywood producers is based on secret experiments realized with nanotechnology by US army, CIA and American Universities at the cost of the health and the honor of thousands of citizens in the world. This is the reason of the security with which Hollywood's stars and producers affirm:

"Today's science fiction will be the real science of tomorrow."

Confirming this rule, The producer of Person of Interest, also said:

"we were very much hoping that all of the ideas in the show, which started as science fiction, would become science fact"⁽¹⁸⁾.

Actually, recent researches alert that :

"The science fiction of today are illegal and forced experiments that are currently being carried out in the world" ⁽¹⁶⁾.

b) The discovery of mafia of cerebral internet in United States.

There are many evidences that indicate the existence of a network of organized crime to develop the cerebral internet in the world. In EEUU; the mafia of cerebral internet is organized by own White House, being its main operator the former US president Barack Obama, the strong suspect is based in three facts:

-Recent researchs warns that the scientific mega projects of the human brain organized and presented by Barack Obama such as BRAIN project and Human Connectome are developing with illicit human experiments with brain nanobots by nanomafias ⁽¹⁹⁾.

-The relation of Barack Obama with Foundations. Foundations are considered human farms of nanotechnology. In 2014, Barack Obama founded "The Obama Foundation" in Chicago ⁽¹⁶⁾.

Own declarations of Former US President Barack Obama. Obama in a recent public meeting said expressions that suggest que American cities such as Chicago are gigantic human laboratory to develop cerebral internet and hive mind ⁽¹⁶⁾.

c) Many evidences indicate that Newyork is a city spied on with cerebral internet

Although Person of Interest is promoted as science fiction, it would be really recreating the reality of New York's. New Yorkers would be real "Persons of interest", they could be being secretly and permanently monitored with the cerebral internet by the mafias of the American government. This suspect is based in two facts:

-The discovery of mafia of cerebral internet in EEUU that is organized by former President Barack Obama and Dave Eggers ⁽¹⁶⁾.

-The campaign of New York as Smart city.

Smart city is an urban area that uses different types of electronic data collection sensors to supply information which is used to manage assets and resources efficiently. The city of New York has been announced as the Best Smart City of 2016 as part of the World Smart City Awards ⁽²⁰⁾. The development of Smart cities has a main component: The creation of Smart Citizen ^(21,22), the Citizen with brain microchips. In fact, the Smart City campaign is another intellectual camouflage to develop the societies of citizens spied on with the cerebral Internet. (Fig 4 y 5) Promotion of Smart Citizen is associated to iconography of robotization, this fact reinforces this suspect: Smart Citizen will be spied on with cerebral internet and subjected to a process of human robotization. ⁽²³⁾

Fig 4: The Big Fraud: Smart city and Smart Citizen

- Toward cities spied on with cerebral internet-

Promotion of Smart city in San Borja (Lima, Peru) (Left) Smart city is a city with smart citizens, this message is the title of many books (Center) Promotion of smart cities is associated with subliminal publicity of cerebral internet (Right).

Fig 5: NewYork: A city spied on with the cerebral internet

-The secret script of "Person of interest"-

Recent research warns the development of a mafia of the cerebral internet in the United States, organized by former US President Barack Obama(Left). New York is considered smart city (Center), Smart city is prepromotion for citizens with brain nanobots. All these facts point that New York is a city spied on with cerebral internet. New York citizens are "Persons of interest" in the real life.

Source: Left (Ref 16) Center (Digalix.com)Right (Copyright author)

Discussion:

Person of interest is an evident promotion of cerebral internet, and there are many evidences that actually recreate development of cerebral internet in New York. New Yorkers are "Person of interest" in the real life.

Cerebral internet is promoted by the press as a benefit or natural evolution of internet⁽²⁴⁾ however, it is a permanent violation of privacy, of communications secret, and is considered the most powerful extortion weapon owned by the common crime and the state terrorism.

The media is the main source of the messages and images that reach people⁽²⁵⁾, therefore is the main tool for manufacture consent towards cerebral internet. This is the reason because "Person of interest" is one key piece of a gigantic program of the White House to manufacture the voluntary assent of the society towards cerebral internet.

The objective of the serie seeks to convince the spectator to accept cerebral internet and coexist with the daily espionage by an elite of millionaires who have access to the private life of everyone, but that does not lose its privacy; in other words, the tv serie seeks to convince the spectator to give their private life to the oligarchy that governs the world under the safety swindle, oligarchy to which evidently belongs the Hollywood magnates. Thus, American government and transnational companies will have legal access to people's private lives *without legal claim*.

The knowledge is power, for this reason cerebral internet gives an immense power to those who control this network, the power of the information of the cerebral internet is recreated in a dialogue of the first chapter of the serie:

"I know exactly everything about you, Mr. Reese. I know you've spent the last two months trying to drink yourself to death. You see --knowledge is not my problema".

"You need to understand, Mr. Reese. The information I have is incomplete - but it's never wrong"⁽²⁶⁾.

The great amount of information obtained with cerebral internet gives immense power of extortion to transnationals of technology such as Google. Recent Google's expressions only can be explained with secret experimentation with cerebral internet.

Eric Schmidt, Executive Chairman Google (2001-2015) said this threatening phrases.⁽²⁷⁾:

"We know where you are. We know where you've been.

We can more or less know what you're thinking about"^(28,29).

"If you have something that you don't want anyone to know,

maybe you shouldn't be doing it in the first place." (30).

The real message of all these expressions of Google is:

"You should not do anything that opposes the mafia of government and transnationals because we are looking all your life with the cerebral internet,

if you oppose our government mafia, all your private life will be exposed"

The world plutocracy is very interested that citizens accept voluntarily using the cerebral internet. Popular culture plays a key role in the transmission of ideas, this is the reason why TV series like Person of interest are designed carefully to promote cerebral internet, its intellectual camouflages and cliches related to it, among them:

a) Manufacture the consent for the mass surveillance under the argument of national security.

The pretext of the creation of "The Machine" (a recreation of cerebral internet) is security, the program explicitly states that the machine was developed in response to 9/11. Since September 11, the priority is to try to identify and expose the terrorists before it is too late. Popular culture has been the key element in the promotion of the culture of fear, there is a millionaire production with the aim of promoting the culture of fear. (31,32). Person of interest reinforces post-9/11 culture of fear and the culture of surveillance. (33-35) It was premiered on Sept. 22, 2011, a decade after the terrorist attacks of Sept. 11, 2001. The title of the serie in spanish is "Vigilados" ("Monitored")

The messages of the series are clear:

"Mass surveillance is the medicine against terrorism", "your safety is the objective, the sacrifice is your private life", "The end justifies the means".

The title of the serie has this objective justify the permanent surveillance of chose "person of interest" under the pretext of security. According to the Cambridge dictionary:

"Person of interest is a person who the police think might have been involved in a crime, but who has not been arrested". (36)

In the real life, "Person of interest", is a chosen citizen by the mafias of the cerebral internet because can benefit to the government mafias, thus a Person of interest can be a Miss universe, a millionaire, a lawyer, a eminent scientist, or an enemy to the interests of the government mafias such as honest judges. (Fig6)

Fig 6: Cerebral internet's main goal: The sex life of young women, nor her security

The serie promotes the message "mass surveillance is for safety of citizens"(Left) In the reality, the main objective of mass surveillance with cerebral internet is obtain sex life of beautiful women, a millionaire secret business of TV press in the world.

Source: Left (Person of interest.The promotion) Right (Copyright author)

b) "Person of Interest" promotes digital fascism

Digital fascism is a government that will control citizens with invasive neurotechnology such as brain nanobots. Although scientists of the big transnational promote brain nanobots as innocuous and as a

benefit for the society⁽³⁷⁻³⁸⁾, they only inform that brain nanobots give connectivity, but does not inform that "connection will make us vulnerable"⁽³⁹⁾. Actually, nanobots can be a weapon against the citizen. Brain nanobots would make us lose our mind control, the citizens would be controlled by others and thus they would lose their autonomy; turning us into human robots, they would lose their privacy due to being permanently spied on with the cerebral internet, they would lose their identity since their memory can be deleted with brain nanobots. Thus, if the citizens are spied, controlled mentally and do not have identity, they would become human slaves at the service of the transnational companies and economic powers⁽⁴⁰⁾.

In digital fascism there will be two social classes:

An elite of millionaires, who will not use nanobots and brain microchips, they will have access to video centers to spy, control and enslave the rest of society. The rest of society, digital slaves, will use invasive neurotechnology and the cerebral internet, devices that will be mandatory to work in their companies⁽⁴⁰⁾.

"Person of interest" subliminally promotes the cerebral internet because this is the main tool of digital fascism, its permite development of the different components of fascism such as mind control, erasing of memories, surveillance, torture or destruction of sexuality. "Person of interest" also directly promotes several components of digital fascism, such as loss of privacy (permanent surveillance to citizens), homosexuality, (the main female characters of the serie are lesbians) mind control (the serie recreates an avatar boy). Analysts express:

"Person of interest shows us what techno-fascism really looks like"⁽⁴¹⁾

It is necessary to highlight that Nolan also produces Westworld, it is another series that promotes the same messages of "Person of interest", the permanent surveillance, mind control, homosexuality and super artificial intelligence.⁽⁴²⁻⁴⁵⁾. Both series also promote and recreate the uses of the cerebral internet, "Person of interest" recreates the espionage with the cerebral internet, West world recreates the mind control with cerebral internet. The promotion of Westworld is that this serie recreates humanoid robots

(robots like humans), however the real state of artificial intelligence does not explain the humanoid robots of Westworld. Actually, Westworld recreates human robots (robotization of human beings). The relationship between "Person of Interest" and Westworld is clear, in short:

Digital citizens recreated in Person of interest,
they will be the human robots of Westworld in the future

The production of both series with digital fascist message corroborates that Jhonatan Nolan is the main key piece of campaign of American goverment for the promotion of digital fascism.(Fig. 7)

Fig 7: Digital Fascism's promotion : From Person of interest to West world

-The Jhonatan Nolan's job -

Person of interest recreates smart citizens, citizens with brain chips (Left) brain chips are the main tool of human robotization, Actually, Westworld recreate human robots, no humanoid robots. Westworld s human robots are the future of Person of interest's smart citizens.

Source: Left (Graphic recreation based in Person of interest s promotion)

Right (Westworld. Season 1- Chapter 7 Trompe-l'œil)

c) "Person of Interest" promotes friendly fascism

Society has voluntarily given part of their private lives in emails,facebook, and telephone calls to the transnationals, former Google CEO said:

"With your permission you give us more information about you, about your friends"⁽²⁸⁾

Nowadays, with the advance of invasive neurotechnology such as brain microchips and cerebral internet, it is possible that the transnationals of technology such as Google or Facebook can get all the information of a citizen's life such as routine life, memories, dreams, sexual life, among others.As well as the transnationals have achieved to convince citizens to give part of their private life, nowadays, the transnationals want to convince citizens to give all the information of their lives that can be obtained with the cerebral internet.It is necessary to remember that knowledge is power, this large amount of private information gives immense power totransnationals of technology,

this transnationals secretly co-govern the world together with the elected governments. The transnationals have chosen a method to achieve this megaobjective:

Friendly fascism.

Analysts express in books:

"Most of us imagine totalitarianism as something imposed upon us-
but what if we're complicit in our own oppression?"⁽⁴⁶⁾

Classical fascism has been associated with violence, for example Hitler's fascism or Mussolini's fascism.The new American fascism would be a type of corporatism without the violence associated with the older fascist policies⁽⁴⁷⁾.

In Classic fascism the main method is the violence;
in friendly fascism the method is swindle, the misleading advertising

The specialists in marketing are who develop the ideas of American establishment in publicity and different intellectual camouflages with the purpose of deceive society to accept digital fascism and its different components such as the permanent espionage of the private life, mind control, erasing of memory and homosexuality.So the mafia of neuromarketing in Hollywood develops the following strategies :

- " You must accept losing your privacy for your safety"
(the objective : convince the citizen to accept surveillance of private life)
- "It is very important that you must control your emotions"
(the objective : convince the citizen to accept mind control)
- " you must erase your bad memories"
(the objective : convince the citizen to accept erasing of memories)
- "you must use brain nanobots to become a cyborg or God"
(the objective : convince the citizen to accept use of brain nanobots)

In short, the main objective of friendly fascism is:

Citizens live happy being digital slave,
illicitly enriching an elite of millionaires that govern the world

Analysts express:

"We are heading towards the world of The Circle or Person of interest
without putting up much of a fight"⁽⁴⁸⁾.

d)Mass surveillance is administered by Superheros

Nolan seeks to introduce into the unconscious of the viewer the message that mass surveillance is developed by protectors of the citizen, mass surveillance is developed by Superheros. Analysts consider that Jhonatan Nolan, who wrote the script for recent films about Batman, recreates the characters of Batman in "Person of Interest", thus, the billionaire Bruce Wayne is recreated by Harold Fynch, who lives in underground places, recreating the batcave, Reese recreates the superhero Batman, and the prosecutor Fisco recreates the prosecutor Gordon.⁽⁴⁹⁾ The machine spies and obtains the data for this team of "superheros" that performs the work of crime prevention. Analysts also consider that Person of Interest's surveillance team recreates a team of "modern superheroes", humans from intelligence services (Reese y Shaw), human personal belonging to law enforcement (Carter and Fusco), semi humans (Root with brain machine interface), and technological forms (The Machine).⁽⁴⁹⁾

It is clear that the careful choice of actors seeks to reinforce the image of watchmen as guardian angels. Harold Finch, the person who organizes the surveillance, is an invalid, in order to give the subliminal message that the watchmen will not harm citizens. The main actor, Jim Caviezel, played Christ, and in several chapters of "Person of interest" he assumes the role of "Guardian Angel" who advises people to avoid committing crimes,⁽⁵⁰⁾ subliminally repeats the role of Christ, thus Caviezel goes from Christ to Angel of safety. However, the message of the Tv serie: "Massive surveillance is managed by supervigilants", contrasts with reality, recent research reveals that massive surveillance with cerebral internet is developed by journalistic mafias that obtain the sexual life of university women to commercialize but the most serious fact is that mass surveillance is handled by mafias of policemen, prosecutors and judges, they use cerebral internet as a weapon of extortion.^(5,12)

e) Mass surveillance is carried out by super artificial intelligence

American stablishment seeks to create in the unconscious of citizens the idea that the mass surveillance system is made by supercomputers and highly developed software. US government wants to use the image of computers so that citizens accept mass surveillance, *computers are considered honest, accurate and impartial*. "Surveillance by default" is another cliché of the US government that reinforces the message that mass surveillance will be carried out by supercomputers and that the objective of surveillance are terrorists, but by default, the rest of the citizens also can be monitored (^{51,52}).

The secret goal of this message "supercomputers perform mass surveillance of citizens" is that citizens believe that the future management of private information obtained with cerebral internet, (private life, sexual life, thoughts, dreams, memories), will be in charge of supercomputers, they will store this audiovisual material and avoid leaks.

A similar message is expressed in The Circle, where by "mistake of the system", the sexual life of the parents of the main star is spread in social networks ⁽¹⁶⁾.

The secret message is:

"The supercomputers are the only ones that will have access to our sexual life, nobody will see our privacy",

Nolan said about the serie:

"If the legacy of the Second World War was the atomic age, then what might emerge from the war on terror would be artificial intelligence."?"⁽⁵³⁾

What if humanity created an artificial intelligence capable of preventing crime?"⁽¹⁰⁾

"what would happen if, behind all data being collected and sorted by our government — all of the e-mails, texts, phone chatter and search engine trails — there were a benevolent artificial intelligence that is in its clumsy way, is looking out for the average person"⁽¹⁸⁾.

"We took the position that in this headlong, post-9/11 rush to prevent terrible things from happening, the only true solution would be to develop artificial intelligence. you would need a machine at least as smart as a human being".⁽³⁴⁾

The message of "Person of interest" : "Massive surveillance is done by supercomputers and supersoftwares" is surprisingly repeated by the most promoted defender of privacy, Edward Snowden.

In 2012, in the chapter "No Good Deed," the chosen "person of interest" was Henry Pecker, a N.S.A. 33 year-old analyst who discovers that his agency is conducting a mass surveillance by a super artificial intelligence.⁽⁵³⁻⁵⁵⁾ Surprisingly, a year later, by a suspicious coincidence, Edward Joseph Snowden, a former Central Intelligence Agency (CIA) employee, reveals the existence of a mass surveillance of NSA in the world based on super software such as PRISM.⁽⁵⁶⁾ Thus, suspiciously a year in advance, the television series predicted the Snowden case. Henry Pecker even had physical characteristics similar to Snowden. It is necessary to highlight that Snowden is promoted by the world press as the agent more informed about mass surveillance of the CIA, however he only has reported massive surveillance systems done by computers and supersoftware such as PRISM, incredibly despite the fact that he continually gives interviews about the state of mass surveillance⁽⁵⁷⁾, he has not reported massive surveillance with cerebral internet, despite that there are many researches that already alert illicit development of cerebral internet in Latin America⁽⁵⁾. (Fig. 8)

Fig 8: Person of Interest: The pre-promotion of Snowden,
the false prophet of cerebral internet

In the TV serie, Henry Pecker, a NSA’s worker, reveals massive surveillance with supercomputers and software (Left) Surprisingly, a year later, Edward Snowden, a NSA’s worker repeats the same message, mass surveillance is secretly developed with supercomputers and supersoftware.(Center) Snowden is promoted as hero (Right) however Snowden hides the cerebral internet, the most powerful weapon of mass surveillance of US government.

Source: Left (Ref 54) Center (The Washington Post) Right (thelibertarianrepublic)

It is evident that Snowden knows cerebral internet, but he hides it, he hides the main weapon of CIA for massive surveillance. Actually, Snowden’s repetition of US government cliché, “Mass surveillance is done by computers”and the concealment of the cerebral internet are evidences that indicate:

Snowden continue being an agent of the CIA, a main CIA’s agent.

The message of “Person of Interest” and Edward Snowden: “The main mass surveillance is developed by supercomputers,” seeks to hide the reality. Recent research warns that the main mass surveillance is carried out by a mafia that develops the cerebral internet, main massive surveillance with cerebral internet is not developed by an super artificial intelligence. The private information obtained with the personalized surveillance of the cerebral internet illicitly enriches a corrupt circle of journalists, prosecutors, judges, police and politicians.^(5,12,16)They spy, torture, extort and damage the health of citizens who secretly and without their consent have invasive neurotechnology such as brain nanobots

f)The Mass Surveillance system is our new God

In “Person of Interest”, Ruth recreates a digital slave that communicates with the cerebral internet, she accepts cerebral internet as a God. The serie seeks to provide the message that mass surveillance is performed by a super intelligent machine (really a re-creation of the cerebral internet), which is shown as a God, an omnipresent entity that the citizens have to serve, similar to Skynet in the Terminator saga, J.A.R.V.I.S and supervillain Ultron from The Avengers, or Hal 9000 from 2001: A Space Odyssey. In Person of interest “The machine”is described as God:

“The machine is everywhere, watching us with 10,000 eyes”

For Catholics, God sees everything, and guides his actions, cerebral internet performs an action that can simulate God. Cerebral internet accompanies and watches all our daily activity, it simulates the voice of the unconscious, and for this reason cerebral internet has been used as a weapon of war, taking advantage of the faith. Cerebral internet was successfully used by US army in the Gulf War, it was named as "the voice of God".⁽¹⁶⁾ This is the reason why the press subliminally promotes the cerebral internet as God, in editorial cartoons and newspaper articles. The main subliminal promotion about cerebral internet as God, is related to Google^(58,59). The reason of this promotion is a secret of the world press: Google is secretly developing the cerebral internet with Google brain chip in the world. (Fig9).

Fig 9: The secret of Ruth :The cerebral internet

Surprisingly, the "crazy patient" knows all the private life of psychiatrist. This scene only can be explained for a Intelligence center that sends the private information of psychiatrist by wi-fi to Ruth's brain-machine interface

Source: Copyright author. Recreation based on Person of Interest. Season 3.Chapter 1: Liberty.

In short:

The new God that promotes "Person of interest" and transnational's press
it's the CIA and cerebral internet mafia .

g)Opponents to the mass surveillance system are criminals

"Person of interest" repeats the cliché of American Stablismt "nothing to hide". A chapter of the serie has this title".⁽⁶⁰⁾ The message is:

A honest person say: "I've got nothing to hide" and therefore does not express opposition to government surveillance.

In a chapter of the serie the wife of a senator says:

"Those who care most about privacy are always those who have to hide"⁽⁶¹⁾

In short, the dishonest are the people who do not want to lose privacy,if you claim about surveillance is because you are a criminal.Those who try to resist living their lives publicly and being constantly surrounded by social media are now suspects.It is a false dichotomy of choice: either we accept total surveillance or we are criminals worthy of suspicion.Nowadays, Hollywood produces a whole series of films and television series where the defense of privacy is presented as a crime such as recent films, The Circle and Annon.⁽⁶²⁾

In the serie Person of interest, the defense of the human right of privacy is even presented as an act of terrorism, this serie shows "Vigilance" , it is a terrorist group that kidnaps the main representatives of the American establishment to make a clandestine trial for the mass surveillance of citizens.(Fig10)

Fig 10: The "Popular Trial" to United States Government by mass surveillance

Vigilance, a terrorist group that defends privacy, kidnaps government representatives to carry out a clandestine trial. Actually, US Government should be legally prosecuted by mass surveillance by internet cerebral in the world.

Source : Person of Interest. Season 3.Chapter 23: "A House Divided"

Actually, "Nothing hide" is other fraudulent message of plutocracy that governs the world. These many elements of human behaviour best served by secrecy including things like religion, sex, politic. "Nothing to hide" doctrine is nothing more than a form of social intimidation to expose that do not conform.⁽⁶³⁾

h)Person of Interest promotesprecrimen,

The message of Precrime is: "crimes can be detected before they are committed"

The concept is popular due to the film The Minority Report, in which the policy uses humans (Precogs) who give information to the police and about future crimes. The promotion of the press about precrimealso says:

"Data, not psychic energy, drives today's pre-crime technology".⁽⁶⁴⁾

In "Person of Interest", the detection of precrimen relies in the information about future crimes that is obtained by a supercomputer. The Machine can predict when ordinary people are planning violent crimes.

Precrime is promoted in science fiction but also in criminology journals^(65,66), it is already being implemented precrime systems in US commissaries, but the promotion of this US precrime systems is associated with promotion related to invasive neurotechnology⁽⁶⁷⁾, which reveals a clear intention to legalize the use of the cerebral internet as a pre-crime tool in the reality. The reading of the mind with the cerebral internet allows to knows which citizen could commit a crime. Prodelictive thoughts "thought-crimes" can be used as an excuse to justify the use of the cerebral internet in citizens. Under the precrime figure, government mafia could turn innocent citizens into criminals, the pre-crime would become "the crime of the honest citizen", in that way any honest opponent could be punished only with his thoughts in a fascist government. However, thereality is different, the main objective of mass surveillance of the mafia of the cerebral internet is not the precrimen, *are the private life of citizens*. The real "persons of interest" are citizens chosen by the cerebral internet's mafias for their illicitalen richment such as millionaires.

The mafia of the cerebral internet looks for crimes but only for extortion.

Cerebral internet is the more powerful weapon of extortion.

Pre-crime is promoted in books and films that promote transhumanism.⁽⁶⁸⁾, actually: The precrime is the Trojan horse of digital fascism.

An example of this use is already happening in Peru, recently, Peruvian government has initiated the "barrio seguro" campaign (safe neighborhood)⁽⁶⁹⁾, as part of the social responsibility campaign, the current President of Peru Martin Vizcarra has expressed:

"We are sure that in 2021 we will have more than 120 safe neighborhoods"⁽⁷⁰⁾

Recent research warns that campaigns of social responsibility such as "Barrio seguro" are scams that really seeks to spy on poor communities with the cerebral internet⁽⁴⁰⁾. The secret goal is to

violate the privacy of the citizens of these poor communities with cerebral internet, and then to justify the violation of privacy with the cerebral internet with crimes or prodelictive thoughts that can be found with cerebral internet. Thus, under the crime prevention argument the Peruvian government plans to legalize the secret and massive implantation of the cerebral internet in poor communities and turn them into digital ghettos like seed of digital fascism. Recent research alert that this is the future of Latin American Valley such as Yachay⁽⁷¹⁾.

Person of Interest also allows to know how the cerebral internet works and its possible use against the citizen, among them:

The cerebral internet as a weapon of state terrorism

The series recreates how the cerebral internet can be used as a weapon to destroy person's life in a few days with the use of private information obtained with the cerebral internet There are two uses recreated in the serie:

-**"The biography"** is recreated in the chapter "Nothing to hide", it is a "documentary" based on videos of the victim's private life obtained with the cerebral internet in order to destroy his honor. (Fig 11) Actually,

Fig 11: The Biography: A weapon to destroy the honor

-The secret uses of the cerebral internet-

The mafias of the cerebral internet select audiovisual material obtained with cerebral internet for destroy the honor of the person, the mafias of journalist as call it "the biography" that is presented as "documentary". This use of cerebral internet is recreated in the serie, in a public ceremony celebrating 15 years of marriage, a video of sexual relations of the husband with the lovers is disseminated as "documentary".

Source: Person of Interest. Season 3. Chapter 2 :Nothing to Hide

"The biography" is the most powerful weapon of extortion of world press.

- **"Individualized terrorism"** or "individualized fascism" is recreated in the serie in two chapters ^(60, 72), it is a terrorist method similar to megabullyng, in this tactic the social life of a victim is systematically destroyed in few days with sensitive information obtained with cerebral internet. Strategic private information of victim with brain nanobot is given by mafias to all the people of the social environment of the victim such as friends, members of family, coworkers and *mainly to foes*, with the objective of destroying all his life, thus the objective is the destruction of labor relations and producing unemployment, seeking his imprisonment, his economic bank ruptcy, destruction of family relationships, dishonor for life and seek that the victim commits suicide. In the TV serie, Khan, the victim, for the power of attack, himself comes to a conclusion that the attack was from an superartificial intelligence, actually he was victim of mafia of cerebral internet.

(Fig 12)

Fig 12: Individualized Terrorism :

-Cerebral internet as weapon against the citizens-

All information about life of the victim obtained with cerebral internet is used by mafias to destroy the life of the victim . This is a recreation of uses of cerebral internet by mafias of journalists in the reality

Source: Person of Interest. 4ta Season.Chapter 19."Search and Destroy".

It is Very likely that this terror is ttacticis being secretly use businessmen in New dagainst York or citizens opposed to the interests of US government mafias in the world.

Person of interest also recreates punitive psychiatry,it is the deliberateaction of inventa psychiatric illness to a citizen to discredit him before society. Harold Fynch (he secretly works for US government) invents the diagnosis of schizophrenia a Ruth with the goal to hide the telepathy with the machine (a recreation of communication with cerebral internet). In reality, punitive psychiatry would be used to cover up the accusations of espionage with cerebral internet as is recreated in the serie and thus illicitlyenrich to psychiatristsby concealing the crimes of the CIA.

Cerebral internet can be involuntarily confused with psychiatric illnesses but also intentionally corrupt psychiatrists can conceal the cerebral internet with psychiatric illnesses. Several diagnostic categories could be confused involuntarily with the cerebral internet given the scarce information about it but corrupt psychiatrics could intentionally hide cerebral internet under the camouflage of psychiatric diseases so the "thought in hive" of the cerebral internet can be concealed by mafias of psychiatrists as auditory hallucinations of schizophrenia, the surveillance by mafias of the cerebral internet could be covered up with the diagnosis of delirium disorder, the permanent espionage with the cerebral internet by the syndrome of Show of Truman.

In a global vision,gathering all their cliches , in short, the real message of the "Person of interest" is:

"The cerebral internet will be administered by supercomputers, compile all the information of our lives and select what is relevant as a threat to security. We should not worry about the leak of our private life or secret data to the mafias because only computers will see our sex life, no human being will see our sexual life, we must trust them as we trust in the privacy of our email. The life of citizens is not the priority of surveillance, only surveillance of terrorists, however we will monitored by default by supercomputers.We must accept with confidence and tranquility cerebral internet as a new God. Snowden, the hero of privacy,that revealed the massive surveillance by computers to us, will recommend us the best applications on our smartphone to control the cerebral internet.

Person of interest must be seen knowing this socio-political context and desin formation campaign of the world press. Although Nolan has described the series as science fiction, in some interviews he recognize "conversations with special forces and federal intelligence officers and documents"⁽³³⁾ and DARPA's projects as origen of script"⁽⁷³⁾. The role assigned in secret by the US government to Nolan is similar to the role designated by the government to other Tv series producers such as Robert Kirkman that promotes mind control in The Walking Dead.

This is a Hollywood mafia whose key piece is a mafia of prosecutors in the world.

(Fig. 13)

Fig 13: Mafias of prosecutors in Latin America:

Key partners of production of Tv science ficition Jhonatan Nolan (Left) Peru is the main place where there is illicit experimentation with brain nanobots for developing film and tv series of science fiction. Prosecutor of the Nation Pablo Sanchez Velarde (2015-2018) and Callao prosecutors (Right). None prosecutor in the world has denounced massive surveillance with cerebral internet.

Source: Left (Getty images)Right (Ref 12)

Conclusions:

Person of Interest is an American science fiction television serie that recreates massive surveillance with cerebral internet of citizens with secret implantation of invasive neurotechnology. Actually, the movie seeks manufacture the consent to the use of the cerebral internet under the argument of security. The serie aims to recreate the secret reality of Newyork, a city spied on with the cerebral internet. It is very likely that there are many real "Person of interest" in the world, millionaires, prosecutors, beautiful women, among others, who are permanently monitored, not for their safety, but for the illicit enrichment of a mafia of prosecutors, policemen, and journalists. The world society shall know the crimes committed by this Hollywood's mafia that aims to become a great organized crime network in the world.
